

Golf Tips - Driving

I think most of us can agree that there is no better feeling than hitting a long drive right down the middle of the fairway. Let me help you become a better driver of the golf ball with a few simple tips.

- Make sure you have the right equipment.
 - Getting fit for the right head, loft, and shaft are important factors in becoming a consistent and good driver of the golf ball.

- Don't rush the take-away
 - Feel like the arms and body are moving back together
- Full Turn & Smooth Transition
 - Your goal is to make your full turn, and stay connected at the top. Rushing from the top of the swing leads to the hands getting away from the body, resulting most commonly in an over the top swing.
- Create speed & hit up on the golf ball
 - Once you have made the smooth transition, it is all about creating speed and hitting up on the golf ball. Too many players have a downward attack of angle on their driver swings which creates too much spin & low launch characteristics.

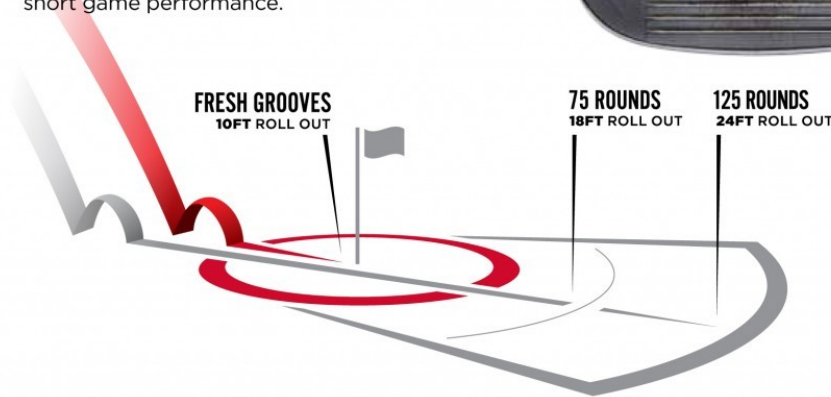

2019 Wedges Hot List

Did you know that wedges should be replaced more than any other club in the bag. The facts are that the short game accounts for approximately 50% of the shots you take during a round, and wedges tend to wear quicker than other clubs (ex. 7 iron) because you are hitting them more regularly. Check out some of the great options below that we will have in stock this year.

TRUST YOUR GROOVES AGAIN.

All wedges wear over time.

If your wedge looks anything like the wedge to the right (or worse), you're sacrificing valuable short game performance.
